

Fifth Dimension's Safety Puzzle - Can you eliminate the hazards and stay safe?

The objective is to cover each hazard with a coin, leaving the Safe circle uncovered.

1. Start with seven coins.
2. Place your first coin on any of the eight circles.
3. Move the coin to another circle along one of the straight lines. For example, if you started on Trip you could move it along a line to either Noise or Confined Space. The coin must remain in whichever circle it ends up on.
4. Place coin number two on any empty circle and move it to another along one of the straight lines. You cannot start from a circle more than once.
5. Do the same with each of the other 5 coins – placing them on a circle and moving to another along a line.

Remember: each coin should start on a different circle, and you cannot start on a circle that is already covered by a coin. No coin can move more than once.
